Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2, 17 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Griffin (U. S. Patent no. 6,138,458).

See figure 2, rod 44, coil 58 on first cylindrical member 56, magnet 70 on second cylindrical member

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 4, 7, 9, 11 and 13-15, 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Griffin in view of VanSweden.

Griffin does not disclose the type of connection between the cylinders.

VanSweden shows a spherical bearing 46 between cylinders on a shock absorber. It would have been obvious to one of ordinary skill in the art to have utilized a swivel bearing, such as shown by VanSweden in the shock absorber of Griffin so as to allow

Art Unit: 3683

for lateral play and movement when in use rather than deforming the rod. The connection shown in VanSweden is a universal joint mechanism.

4. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Griffin in view of Nomura et al.

Griffin does not disclose allowing radial movement with the second cylindrical member. Nomura et al teaches allowing the sensor to move in the radial direction in order to have it properly positioned. It would have been obvious to one of ordinary skill in the art at the time the invention was made to allow radial movement with the second cylindrical member as taught by Nomura et al in the device of Griffin in order to get proper positioning of the element.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3683

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
